

TurfSaw TS350

Front attachment for loaders for cutting artificial turf during the removal of artificial turf fields

The TurfSaw TS350 cuts artificial turf with or without infill material. A sliding shoe raises the turf and leads it to the hydraulic saw. Support rollers facilitate the handling. The speed of the hydraulic saw is adjustable from 500 - 1000 rpm thus allowing a cutting speed of 50 meters per minute. The TurfSaw TS350 can be operated with all available loaders by means of different adapters.

Requirements for the use of the TS350

Operation requires a loader with at least 20 kW (27 HP) drive power.

We recommend a continuously variable hydrostatic transmission drive or crawling gear.

350 mm saw blade

support wheel and guide

electro-hydraulic steering unit

adjustable cutting speed

Chassis	Laser-cut steel frame construction, plastic-coated
Drive	Electro-hydraulic
Saw	Diameter 350 m/500 – 1000 U/min
Feed	Up to 50 meters per minute
Weight	140 kg

Dimensions L 900 x W 2500 x H 1000 mm

Subject to technical alterations
